SUMMARY

Third-year Computer Science Engineering student with a strong foundation in full-stack web development, building AI-powered, real-time, and production-style applications. Experienced with React, Next.js, Node.js, MongoDB, TypeScript, and Docker, with a keen interest in software engineering and solving practical, real-world problems.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, Zustand, Framer Motion, Radix UI

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB

Auth / Security: JWT, bcrypt, NextAuth

Tools & Deployment: Git, GitHub, Docker, Docker Compose, Vite

Other Integrations: Socket.io, Leaflet, Razorpay, ZegoCloud, Cloudinary, Multer, Puter.js

PROJECTS

ResumeIQ — AI-Powered Resume Analyzer | *React, TypeScript, Vite, Tailwind CSS, Zustand, Puter.js*

- Built an AI-powered resume analyzer that evaluates resumes against job descriptions and generates custom ATS scores with actionable feedback.
- Integrated Puter.js for browser-based authentication, cloud resume storage, and AI processing without a traditional backend.
- Designed a responsive UI with Tailwind CSS and reusable React components for a consistent cross-device experience.
- Used Zustand for efficient global state management across upload, evaluation, and results flows.

GitHub: <https://github.com/aasthapathak19/ResumeIQ>

Rydex — Real-Time Ride-Booking Platform | *Next.js, React, Node.js, MongoDB, Socket.io, Leaflet, Razorpay, ZegoCloud*

- Developed a real-time ride-booking platform with ride creation, live status updates, location tracking, maps, payments, and communication.
- Engineered real-time location tracking and ride-status updates using Socket.io with a dedicated Node.js server and Leaflet.
- Integrated Razorpay for payments and ZegoCloud for real-time in-app communication.
- Implemented secure authentication with NextAuth and global state management with Redux Toolkit; containerized with Docker and Docker Compose.

GitHub: <https://github.com/aasthapathak19/Rydex>

JobNet — Full-Stack Job Portal | *MongoDB, Express.js, React, Node.js, JWT, bcrypt, Cloudinary*

- Developed a full-stack MERN job portal enabling candidates to search/apply for jobs and employers to manage listings.
- Implemented secure authentication and authorization using JWT and bcrypt with protected user sessions.
- Integrated Multer and Cloudinary for profile-picture and resume uploads with cloud-based asset storage.
- Built a dynamic frontend with React, Redux Toolkit, Redux Persist, Framer Motion, and Radix UI for accessible, interactive UIs.

ACHIEVEMENTS

2nd Position — Frontend Fusion: Secured 2nd position in a multi-round, time-bound frontend development competition involving rapid project development and presentation before a judging panel.

Google Solution Challenge — Participant: Participated in the Google Solution Challenge and developed/presented a software solution based on the challenge requirements.

EDUCATION

B.Tech. in Computer Science Engineering

Maharishi Markandeshwar (Deemed to be University), Haryana
3rd Year | 5th Semester

Expected 2028

CGPA: 7.5 / 10
